

## What is IntraLASIK ?

IntraLASIK is the more modern, blade-free version of conventional LASIK laser eye surgery. The micro-thin flap required at the front of the cornea, is created using a laser that provides over 100 times the accuracy of the mechanical device used in conventional LASIK.

There are a number of important benefits to creating the flap using the Intralase laser:

- Safety
- Reduced risk of dry eye
- Lower enhancement rates
- Rapid restoration of vision
- High range of prescriptions
- Wider range of candidates
- Better outcomes
- Highly predictable
- Minimal discomfort
- High astigmatism correction

## Latest Intralase laser - iFS

As the longest UK provider of IntraLASIK, Centre for Sight continues to lead the UK, as the first to have the latest 5th Generation Intralase - the iFS.

The iFS offers a number of additional benefits:

- **FASTER**  
making it even safer
- **PERSONALISED FLAPS**  
for astigmatism
- **ANGLED FLAP EDGES**  
for improved flap strength

Your introduction to  
**IntraLASIK**  
*laser eye surgery at its best*

# Am I suitable ?

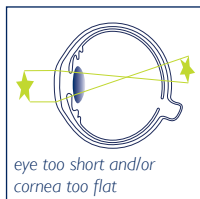

The answer is probably **YES** if you:

- Are over 21 years old and have had a stable prescription for 2 years
- Have healthy eyes with no disease (e.g. cataract)
- Understand the level of vision achievable
- Are within the range of correction
- Are in good health

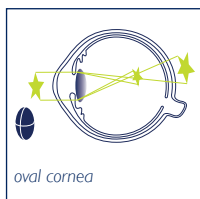

## Shortsight

IntraLASIK is effective for a wide range of myopia up to  $-12$  diopters in selected cases. The level of treatment is dependent on your corneal thickness and pupil size in dim light.

## Farsight

IntraLASIK is effective for up to  $+5.00$  diopters of farsightedness and sometimes more depending on corneal shape.

## Astigmatism

Levels of astigmatism up to 5 diopters can be treated safely and effectively. At Centre for Sight we have expertise in treating even higher levels and have developed pioneering methods, which have been used in treating patients who for instance have had corneal transplants with very high astigmatism.

## The Centre for Sight difference

Established in 1996 by a consultant ophthalmic surgeon, with special expertise in corneal refractive surgery, Centre for Sight now has an international reputation for excellence in corneal care and become the choice of doctors and others in the ophthalmic profession.

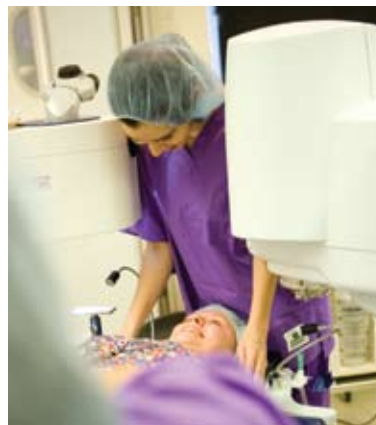

### LEADERSHIP ● EXPERIENCE ● EXPERTISE ● REPUTATION

Eye Surgeons Ms Siew-Yin Then and Mr Saj Khan, are two of many doctors treated at Centre for Sight

As one of the longest providers of laser vision correction, many major developments in refractive surgery have been brought to the UK first by Centre for Sight, including; Zyoptix, Iris Recognition and Registration, the Bausch & Lomb 4D eye tracker, ACE and now the latest 5th generation Intralase, the iFS.

Centre for Sight patients benefit from the safety and reassurance of being treated by an internationally recognised team of professionals, who offer a dramatically enhanced level of expertise and personalised care and treatment, from initial consultation right through to after-care assistance and reassurance.

## The next steps...

### FREE SEMINAR: "Understanding Vision Correction"

An excellent opportunity to meet our surgeons, staff and patients as well as learn all about options of Vision Correction. Many Centre for Sight patients find that attending a FREE monthly "Understanding Vision Correction" seminar is helpful in making an educated decision.

**Book your place at the next seminar: 0800 011 2887**

### FREE IntraLASIK CONSULTATION

Before recommending IntraLASIK, one of our fellowship trained refractive and corneal specialist consultant surgeons will need to perform a thorough ophthalmic examination which includes a number of tests to ensure that your eyes are healthy and that you are a candidate for treatment.

**Book your FREE IntraLASIK consultation: 0800 011 2887**

### FREE IntraLASIK INFORMATION PACK

Many Centre for Sight patients travel long distances to undergo laser vision correction surgery under our expert hands. A highly informative information pack is available for those considering the procedure, who would like to know more before committing to the journey.

**Request your FREE Information pack: 0800 011 2887**
